**ENHANCE** 

YOUR PERFORMANCE

## **HENDRICKSON SHOCK ABSORBERS**

Hendrickson shock absorbers are designed and tuned for optimum ride with specific strokes, damping characteristics, seal designs, and bore diameters to enhance the performance of your suspension system. This contributes to increased steering control, improved braking, greater sensitivity, and better overall performance.

A shock replaced with a non-genuine alternative, can have too long or too short of a stroke than required by the suspension and can lead to expensive repairs. Too long of a stroke may allow over extension of the air springs or increase fatigue on parabolic springs. Alternatively, too short of a stroke can damage mounting brackets.

Genuine Hendrickson shock absorbers can easily be identified by the stamped Hendrickson name, logo, and part number on the dust shield or cylinder.

## HI-TORQUE SHOCK ABSORBERS
