The Universal Group, LLC

Introducing our expanded line of springs from Indonesia!

We are pleased to announce our partnership with PT Indospring, a highly automated, fully integrated, state of the art leaf spring manufacturer in Indonesia. A joint venture with Mitsubishi with a long history of supplying the Japanese OE market, these Indonesian springs offer superior quality and workmanship.

Japanese Technology

- All spring manufacturing equipment is imported from Japan and is supported by Mitsubishi and Morita engineers.
- A major supplier to the Japanese OE manufacturers for over 40 years, the plant operates under strict Japanese manufacturing standards and controls.

Manufacturing Capabilities

- Total capacity of 10,000 metric tons per month.
- The plant is highly automated using advanced robotics throughout the manufacturing process.
- Fully vertically integrated with their own steel and rolling mills, they control and guarantee the steel chemistry, properties and dimensions.

Superior Corrosion Resistance

- Individual spring leaves are coated with a primer prior to spring assembly and painting.
- Spring bolt clips and clench clips are zinc plated.

Added Features and Benefits

- All spring eyes are reamed prior to bushing installation to create a consistent fit.
- With a state-of-the-art laboratory and advanced testing capabilities, PT Indospring delivers worldwide quality.
