The World Rides On Us[®]

ZMD[®] Technology from Hendrickson

Patented Air Spring

- Superior ride quality and driver comfort
- Reduced overall suspension maintenance
- Uniform damping levels over the life of the air spring
- Enhanced cargo protection
- Increased trailer component life

Robust Down Stop

- Reduced labor and costs
- Less maintenance
- Reduced risk of roadside inspections and CSA violations

Warranty Terms

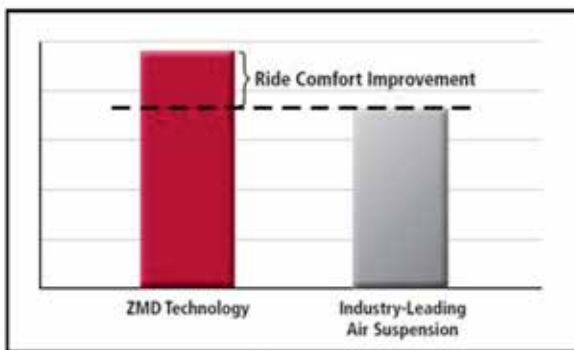

ITEM	PARTS	LABOR
ZMD[®] "Shockless" Ride Technology		
ZMD Air Springs ZMD Down Stops	3 years	3 years
Traditional Air Springs and Shock Absorbers		
Air Springs	2 years	1 year
Shock Absorbers	2 years	2 years

ZMD eliminates conventional shock absorbers and integrates the damping function into the air spring. ZMD air springs exchange pressurized air through channels that interconnect the bellows and piston of this patented air spring.

Unlike a shock absorber whose damping capacity is finite and deteriorates with age, ZMD air springs are designed to provide continuous damping over the life of the air spring. Robust down stops provide maximum durability which helps reduce labor costs and maintenance over the life of the trailer.

Tested and proven ride technology from Hendrickson

Hendrickson's state of the art research and development, testing and real-world driving evaluations have shown that ZMD[®] technology provides superior suspension damping, which offers enhanced ride quality, driver comfort and cargo protection.
